

# AIR BLOW GUN

For the Pressure Cleaning of Dust and Dirt from Everyday Objects

Air Pressure Setting

## WARNING!

Always wear safety goggles when using the blow gun. Never exceed the air pressure stated, never direct the compressed air toward the skin or toward persons or animals. Take care that dust and splinters etc are not blown toward yourself or others.

## USING THE AIR BLOW GUN

- 1) Connect the air blow gun to the compressor and air coil as shown on Page 3.
- 2) Set the pressure regulator knob B as described on Page 3 so that a value of **2** is set (the number 2 on the blue band aligns with the arrow on the knob). This represents a pressure of 2 BAR (30 PSI)
- 3) To operate the blow gun press lever C (Fig BG 1) and direct the nozzle A (Fig BG 1) toward the item to be cleaned.

### 'TOP TIP'

Clean carpets from your car or home very efficiently using the blow gun. Also ideal for keyboards, electrical items and refrigerators.

### MAINTENANCE

Always store the air blow gun in a clean dry environment. Do not use aggressive solvents or cleaning materials when cleaning the air blow gun.
